Sats Stacker's Starter Checklist

Twelve small acts to buy, protect, and use bitcoin.

Fast Acts for Sats

Sats are small pieces of bitcoin. There are 100,000,000 in one bitcoin. Work at your own pace. Approval, transfers, and delivery may add waiting time.

THE SIX ESSENTIALS

- [ ] 1 **Choose a buying service.**
  Compare fees, availability, and withdrawals. Have your ID and bank details ready.
- [ ] 2 **Secure the account.**
  Use a unique password and stronger sign-in protection. Save recovery codes safely.
- [ ] 3 **Make a small first buy.**
  Check the fee and save the confirmation. Turn on the sats display if available.
- [ ] 4 **Compare what you received.**
  Use the sats converter at roughly the same time. Allow for fees, spread, and price changes.
- [ ] 5 **Learn how a wallet works.**
  Understand keys, receiving addresses, and recovery backups.
- [ ] 6 **Review your records.**
  Keep dates, dollars, sats, fees, rewards, transfers, and payments.

SIX OPTIONAL NEXT STEPS

- [ ] 7 **Consider a recurring buy.**
  Choose an amount that fits your budget, and review it when circumstances change.
- [ ] 8 **Try a self-custody phone wallet.**
  Follow its official backup guide, then transfer a small test amount on the right network.
- [ ] 9 **Consider a hardware wallet.**
  Compare cost and compatibility. Buy from the maker or its listed authorized seller.
- [ ] 10 **Set it up and verify the backup.**
  Follow the maker's procedure before funding, then test receiving and sending.
- [ ] 11 **Try rewards on a planned purchase.**
  Check fees and restrictions. Avoid extra spending to chase sats.
- [ ] 12 **Make one small bitcoin payment.**
  Check the details and save the receipt.

The goal is to learn the process. Reaching 100,000 sats depends on your purchases, fees, rewards, and bitcoin's price. Bitcoin can lose value.
